Diploma in Computer Science

Languages

- Malay
- English

About

I am an **Android Developer** with over 4 years of experience specializing in **Kotlin** and **Java**. My expertise lies in designing and building efficient, user-friendly mobile applications. I am passionate about delivering innovative solutions and thrive in collaborative, team-based environments but I am equally capable of working independently when needed. My work emphasizes the importance of seamless user experiences, optimized app performance particularly in enterprise environments.

Professional Experience

Sapura Secured Technologies

Android Developer | Dec 2023 - Present

- Mobile developer of the **New Valuation Information System (NVIS)**, a project replacing the legacy Valuation Information System (VIS), in partnership with Sapura for JPPH (Malaysian Department of Valuation and Property Services).
- Designed and developed the **NVIS app for JPPH officers to conduct site visits** and perform property valuations efficiently, integrating both online and offline capabilities.
- Implemented offline data storage solutions using **Room Database**, enabling uninterrupted use in low-connectivity environments.
- **Tech Stack:** Android Studio, Java, Room, Hilt, IBM MobileFirst, REST API, Postman, GIT.

Wahdah Technologies

Android/Web Developer | Aug 2020 - Dec 2023

- Lead developer for **Wahdah DRIVE** android application, a comprehensive **fleet management tool** for partners on WAHDAH's platform.
- Developed and maintained the Android app, focusing on fleet management, partner operations, and functionalities.
- Optimized app performance, **managed app releases**, and monitored analytics to ensure high user satisfaction.
- **Tech Stack:** Android Studio, Kotlin, Firebase, REST API, Retrofit, Postman, GIT.

Other Projects:

- **QalbyApp:** Contributed to the development of an Islamic lifestyle application, focusing on enhancing the user experience and app performance.
- **Hotel Zamburger:** Created a user-friendly hotel booking app, collaborating with backend teams to ensure smooth integration with booking APIs.
- **WAHDAH Associate Partner:** Managed updates to the earlier version of the DRIVE app built on Xamarin, ensuring partner needs were met.
- **MySmartOH:** Developed an online occupational health management system.
- **Zetpy:** Help developed a platform to help users manage multiple online stores.

Wahdah Technologies

Internship | Feb 2020 - Aug 2020

- Developed **dynamic web sites** for various clients under WAHDAH Technologies' subsidiary, AIST, using **CakePHP**.
- Designed, implemented, and maintained client-driven web projects that met stakeholder requirements.
- Worked on a wide range of web-based solutions including e-commerce platforms and real estate portals.
- **Tech Stack:** CakePHP, MySQL, JavaScript, HTML, CSS.

Key Projects:

- **OurFarm:** Developed a marketplace for local farmers, later rebranded as airasia Grocer.
- **HiHome:** Created a real estate management and buying platform.
